Dear Participants of 21 st Prague – Lublin – Sydney – St. Petersburg Symposium in Humpolec, in the time 3.09.-5.09.2019, Dear Authorities of the Czech Medical Association, Dear Friends of the Czech Purkyne Medical Association, Dear Professors, Dear Doctors, Dear Prof. Ivo Marik. Dear Dr Petr Krawczyk, Dear Friends – orthopedic surgeons, physiotherapist, pediatricians, general doctors gathering on the Symposium, all dear Distinguish Participants of Congress and Symposium – in Humpolec 2019.

It is a big privilege for Polish Group to attend the 21st Prague – Lublin – Sydney – St. Petersburg Symposium in Humpolec

and especially big honour for me to be together with European Scientist in this Scientific Events – now the twenties time.

Here and now – I want to definitely say that any scientific progress in the area of medicine, orthopaedics, rehabilitation, anthropology is only possible with the cooperation and friendship “exchange of meanings and exchange of medical observations” of scientists.

I am lucky – that in my case such friendly cooperation with Prof. Ivo Marik and his team – has for me the history of 20 years.

This orthopaedic cooperation – is especially important – because we can discuss the all of „new” in medicine.

I think it is for both side - profitable and effective – because we can discuss the problems and also publish ours articles in the Locomotors System Journal.

All for better results of the treatment of our patient.

Once again, I would like to thank for this profitable cooperation and all honours directed to Polish Group.

I wish all Participants of Congress and Symposium – good and nice time in Humpolec and fruitful scientific discussions.

Thank you very much.  & some photos
